There will be a rather different method pursued along farming lines during this year than in the past. The agricultural college people are doing a great work in this territory and with the Ex- periment Station co-operating with the farmers results are go- ing to be more or less astonish- ing. Last week Supt. Breithaupt prepared and sent out a quanti- ty of seed to some 200 farmers. This seed is the best for condi- tions here and he has asked a careful record be kept and a written report turned in this fall. Following his directions farm- ers may gain considerable know- ledge.

Frank Fister was in town this week on business connected with the suit for railroad right of way over his land in Crane Creek canyon. Mr. Fister thinks the matter can be adjusted without going into court, as he is willing to settle on a basis of what has been paid his neighbors for right of way, although his place is cut in two and all the water would be fenced off by the railroad, leaving it most inconvenient so far as stock purposes are concern- ed.

Julian Byrd, who has had the greater portion of the town clock fund as trustee, has received a proposition from the Presbyterian church building committee to the effect that the committee pledges its to build a clock tower on the church and furnish whatever bal- ance is needed to get a good four- dial striking clock. It was origin- ally intended to place the town clock on the court house but as the building of a new court house is not considered in the immedi- ate future and as the church is to be a modern structure, centrally located on high ground, he is in- clined to accept the proposition unless some valid reason is brought to his attention why it should not be thus disposed of. He is tired of being responsible for the fund and as we greatly need a uniform time in Burns it will be a convenience to all.

This is done on account of several small pupils who take part and it is de- sired to have the entire program over as early as possible. The admission price is only 25 cents, mere trifle, but was placed at that figure in order that a large number might be thus able to contribute toward the fund for Mr. Carroll. While delivering cattle last Monday to Phil Smith, Wm. Dunn met with a painful accident as a result he is in town suffering from a badly broken and dislocat- ed shoulder. Mr. Smith had thrown down a long wire gate to allow some of the cattle to pass out but the entire bunch started to get away and Mr. Dunn started to head them. He ran his horse to the opening and in turning to start quickly in an- other direction he did not notice that one of the horse's feet had caught in the wire lying on the ground and when he came to the end of it the horse was thrown violently to the ground throwing his rider very hard on his shoul- der. The fall stunned Mr. Dunn somewhat but when he finally became conscious he could move his arm and it was thought it was not badly injured. An ex- amination by the doctor, how- ever, proved it quite serious.
